Contents

Preface
by P. G. Sly and B. T. Hart IX

Water and water science management
Social choice, risk and determinism in water quality management
by P. Cullen 1
Problems of organization in the science, politics and management of water
by R. L. Thomas 7

Habitat changes
Successional changes in habitat caused by sedimentation in navigation pools
by N. G. Bhowmik and J. R. Adams 17
The effect of low water levels on the water quality of Lake Biwa, Japan
by A. Kurata 29

Sediment dynamics, transport and deposition, and distributions
The entrainment of sediments by the turbulent flow of water
by L. W. Apperley and A. J. Raudkivi 39
Hydro-sedimentology of the Johnstone River estuary, Australia
by A. V. Arakel, C. M. Hill, J. Piorewicz and T. B. Connor 51
Resuspension, ephemeral mud blankets and nitrogen cycling in Laholmsbukten, southeast Kattegat
by S. Floderus and L. Håkanson 61
Sediment transport in an inland river in north Queensland
by W. A. Poplawski, J. Piorewicz and M. R. Gourlay 77
Dynamic characteristics under low flow conditions in the Wakool River, New South Wales
by B. B. Sharp and K. S. M. Herat 93
Sediment dispersion: part I, fine sediments and the significance of the silt/clay ratio
by P. G. Sly 99
Sediment dispersion: part II, characterization by size of sand fraction and percent mud
by P. G. Sly 111
The particle size characteristics of fluvial suspended sediment: an overview
by D. E. Walling and P. W. Moorehead 125

Contaminant accumulation, distributions, geochemistry and mineralogy
Ionic alkyllead compounds in environmental water and sediments
by D. Chakraborti, J. A. van Cleuvenbergen and F. C. Adams 151
A study on heavy metal partitioning in sediments from Poyang Lake, China
by J. Chen, L. Dong and B. Deng 159
An environmental investigation of a marine coastal area: Gulf of Gaeta (Tyrrhenian Sea)
by O. Ferretti, I. Niccolai, C. N. Bianchi, S. Tucci, C. Morri and F. Veniale 171
Variability of the heavy metal content of flood deposits (Abstract only)
by H. Leenaers, M. C. Rang and C. J. Schouten 188

Heavy metals in eelgrass (*Zostera marina* L.) during growth and decomposition
by J. E. Lyngby and H. Brix 189
Mercury pollution in Tokuyama Bay, Japan
by H. Nakanishi, M. Ukita, M. Sekine and S. Murakami 197
Distribution of nutrients, trace elements, PAHs and radionuclides in sediment cores from Lake Varese, Italy
by A. Provini, G. Premazzi, S. Galassi and G. F. Gaggino 213
Nickel sorption and speciation in a marine environment
by M. Sadiq 225
The determination of heavy metals in water, suspended materials and sediments from the Langat River, Malaysia
by S. B. Sarmani 233
Trace elements in suspended particulate matter from the Yarra River, Australia
by P. Sinclair, R. Beckett and B. T. Hart 239
Geochemical characteristics of heavy metals in the Xiangjiang River, China
by S. Zhang, W. Dong, L. Zhang and X. Chen 253

Material cycling
Importance of sediments in understanding nutrient cyclings in lakes
by C. Forsberg 263
Characteristics of settling matter and its role in nutrient cycles in a deep oligotrophic lake
by T. Fukushima, M. Aizaki and K. Muraoka 279
Trace metal dynamics in a seasonally anoxic lake (Abstract only)
by K. Morfett, W. Davison and J. Hamilton-Taylor 296
Nutrient remobilisation at the Tiber River mouth, Italy
by R. Pagnotta, C. M. Blundo, T. La Noce, M. Pettine and A. Puddu 297
Use of radionuclides in the study of contaminant cycling processes
by P. H. Santschi 307
Seasonal variations in the loosely sorbed phosphorus fraction of the sediment of a shallow and hypereutrophic lake (Abstract only)
by M. Søndergaard 321
Coupling of strontium and calcium cycles in Lake Constance, Switzerland
by H.-H. Stabel 323

Acid rain and lake acidification
Acid rain and its effects on sediments in lakes and streams
by G. E. Likens 331
Concentrations and distribution of Fe, Zn and Cu in tissues of the white sucker (*Catostomus commersoni*) in relation to elevated levels of metals and low pH
by L. B. Young and H. H. Harvey 349

Microbially mediated reactions and contaminant effects on micbiota
Microorganisms and the aquatic environment
by N. F. Millis 355
Accumulation of poly-β-hydroxybutyrate in a methane-enriched, halogenated, hydrocarbon-degrading soil column: implications for microbial community structure and nutritional status
by P. D. Nichols and D. C. White 369

Bioavailability and toxic effects

Can we determine the biological availability of sediment-bound trace elements?
by S. N. Luoma 379

Sediment toxicity testing in two areas of concern of the Laurentian Great Lakes: Toronto (Ontario) and Toledo (Ohio) Harbours
by M. Munawar and R. L. Thomas 397

Toxicity of metal polluted sediments to *Daphnia magna* and *Tubifex tubifex*
by T. Wiederholm and G. Dave 411

Manipulation and disposal techniques

Nitrate enhancement of nitrification depth in sediment/water microcosms (Abstract only)
by J. G. Cooke and R. E. White 418

Ceramic processing of polluted dredged mud
by C. J. Schouten and M. C. Rang 419

Modelling

A simulation of the process of sedimentation of suspended solids in the Yoshii River estuary, Japan
by K. Nakata 431

The transport of fine-grained sediments in shallow waters (Abstract only)
by C. K. Ziegler and W. Lick 439

Methods and analytical techniques

Uncertainty in description of sediment chemical composition
by R. Baudo 441

Study of metal sorption/desorption processes on competing sediment components with a multi-chamber device (Abstract only)
by W. Calmano, W. Ahlf and U. Förstner 449

Sediment sampling evaluated with a new weighting function and index of reliability
by S. Floderus 451

The use of turbidity in suspended sediment research
by C. J. Gippel 465

Sediment trap assemblages: a methodological description
by L. Håkanson, S. Floderus and M. Wallin 481

Bioavailable metal uptake rate in urban stormwater determined by dialysis with receiving resins
by G. M. P. Morrison 491

A sensitive screening bioassay technique for the toxicological assessment of small quantities of contaminated bottom or suspended sediments
by M. Munawar, S. A. Daniels, D. Gregor and W. P. Norwood 497

The potential in fluvial geormorphology of a new mineral identification technology (QEM*SEM)
by S. J. Riley, R. A. Creelman, R. F. Warner, R. Greenwood-Smith and B. R. Jackson ... 509

Measurements of sediment toxicity of autotrophic and heterotrophic picoplankton by epifluorescence microscopy
by S. R. T. Severn, M. Munawar and C. I. Mayfield 525

A new sampler for collection of interstitial water from sandy sediments
by R. L. Whitman 531
